CLAIM AMENDMENTS

Claim 1 (Currently Amended): A drag harness of a type used by a rescuer to drag a wearer lying in a supine position from a perilous situation, the drag harness comprising two arm loops, each of which has a fixed length and is adapted to receive a separate arm of a wearer, and a drag grip, which is joined to the arm loops solely at a common juncture and which is adapted to extend above the shoulders of the wearer and behind the head of the wearer, if the wearer is standing, whereby a rescuer grasping the drag grip can drag the wearer, via the drag harness, if the wearer is lying in a supine position, wherein whereby the drag harness is made from a single length of strapping.

Claim 2 (Original): The drag harness of claim 1, wherein the drag grip is a drag loop, which has a fixed length.

Claims 3 through 10 (Cancelled).

Claim 11 (Previously Presented): The drag harness of claim 1 or claim 2, wherein the drag grip, the common juncture, or both provide means for supporting the head of the wearer, when the wearer is being dragged, via the drag harness.
